

Talent Testing Services (TTS) Takes Pioneering Steps by Sharing Historical STD Trends in the Industry

[Miami, FL, May 9, 2023] - Talent Testing Services (TTS), the industry testing leader in safeguarding the well-being of talents, is pleased to announce a groundbreaking initiative aimed at fortifying talent safety and promoting overall industry health. In line with our unwavering commitment to excellence, TTS will now provide monthly updates in the form of statistical graphs, showcasing the positivity rates of the Sexually Transmitted Diseases (STDs) that we rigorously test for.

TTS firmly believes that knowledge is power, and by sharing these crucial insights, we foster a collective commitment to the highest standards of safety within the industry. The monthly statistical graphs will serve as a powerful tool, shedding light on historical positivity rates, thus empowering individuals to prioritize their health and minimize potential risks.

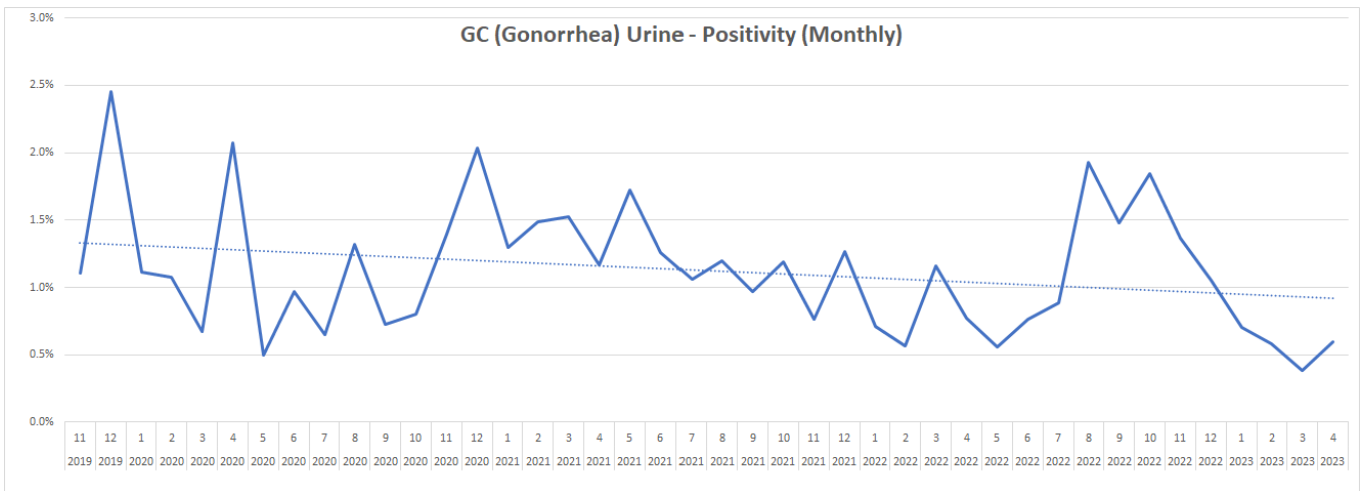

With this pioneering initiative, Talent Testing Services (TTS) reaffirms its position as an industry trailblazer, continuously striving to advance talent well-being and shape the future of the entertainment industry. By combining cutting-edge technology, unparalleled expertise, and a resolute commitment to safety, TTS remains the premier testing resource for Talents in the industry.

Chlamydia Urine - Positivity Index

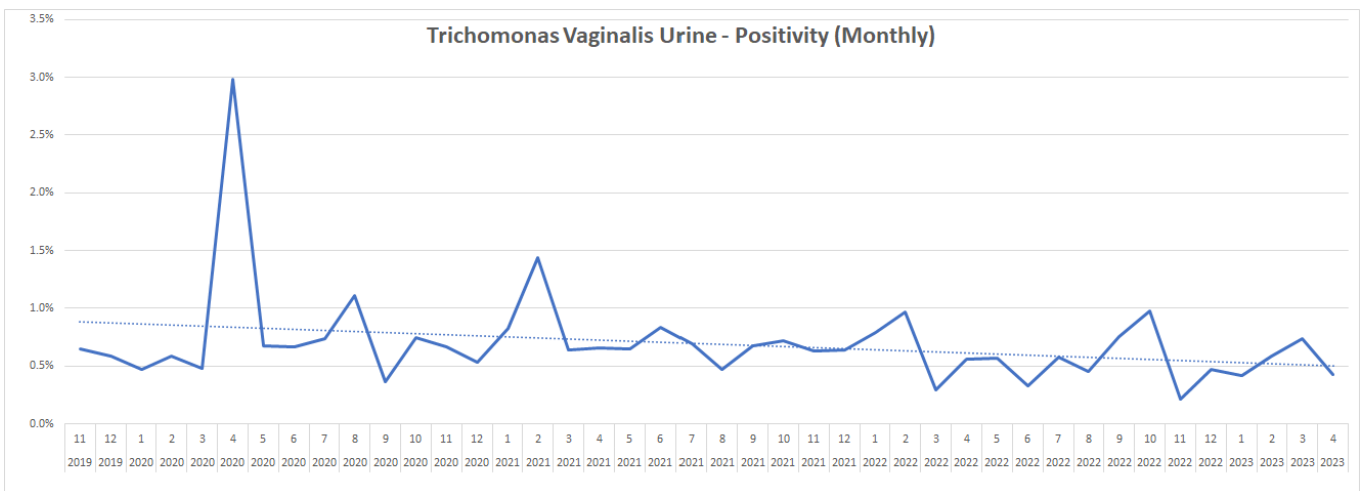

The Chlamydia Urine positivity rate of 1.7% for Apr 2023 shows a level within the range of 1 to 2.0% that was quite steadily observed from Jan to Oct 2022. In addition, if this 1.7% is placed next to Oct 2022 it would continue the downward trendline for the 36 months from Nov 2019 to Oct 2022. Moreover, although the spike from Nov 2022 to Jan 2023 has changed the trendline's direction upward, seeing rates inside the 1 to 2.0% will be the expectation to track as 2023 develops.

GC (Gonorrhea) Urine - Positivity Index

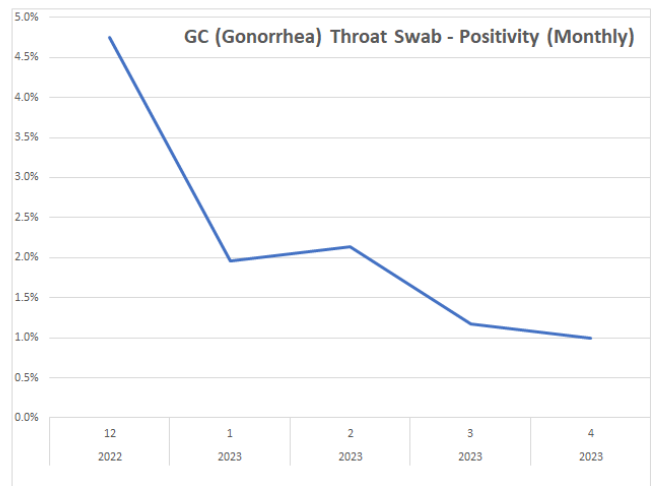

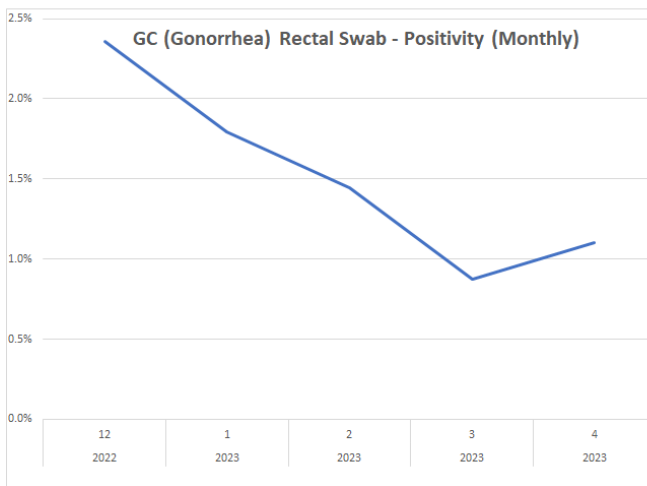

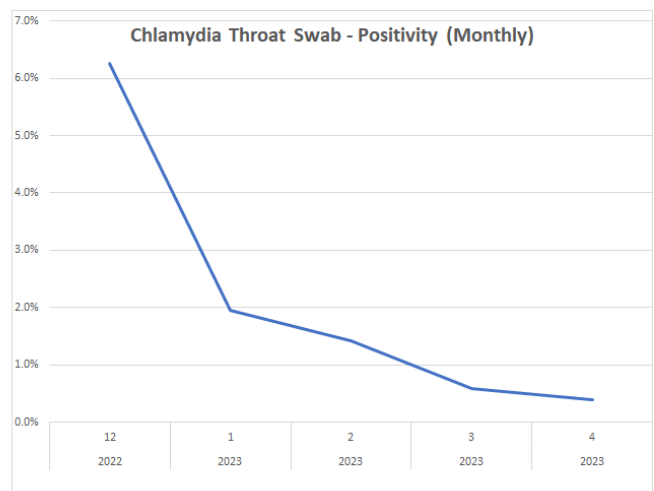

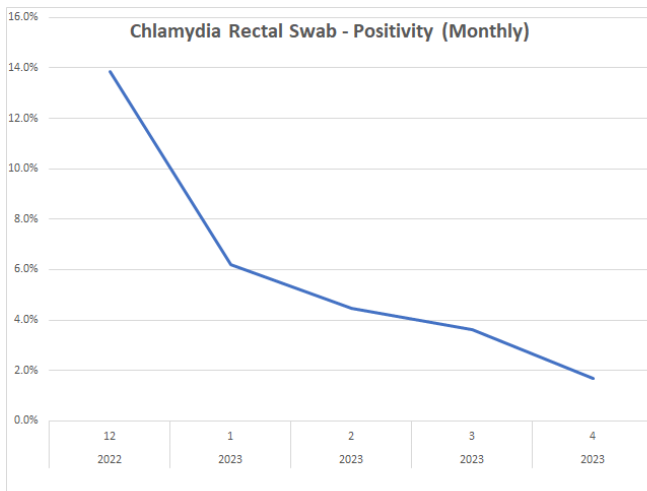

The Gonorrhea Urine rate of 0.6% for Apr 2023 is one of the lowest levels recorded in the 42 month period from Nov 2019, where the downward trendline has been in a range around 1.4 to 0.9%.

Trichomonas Vaginalis Urine- Positivity Index

The Trichomonas Vaginalis positivity rate shows a 42 month downward trendline in the range of 0.5% to about 1.0%. The Apr 2023 rate of 0.4% continues along the same direction.

Chlamydia & GC (Gonorrhea) Throat and Rectal Swabs – Positivity Index

Based on market activity the positivity rates for the four tests below has Dec 2022 as a relevant, starting point where all levels display their peak and then start to trend downward. Please note that the positivity range for each test is unique.
